Career Objective

Aspiring **Software Engineer** with a strong foundation in backend development and hands-on experience in **Python, Sql , Html and css**. Skilled at designing and securing RESTful APIs, integrating databases, and implementing authentication using JWT. Passionate about building scalable and efficient software systems with clean, maintainable code.

Technical Skills

Programming Languages: Python, SQL.

Frontend: HTML5, CSS3.

Databases: MySQL.

Concepts: OOP, Control Flow, Testing.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering *CGPA: 9.0 — 2023–2027*
Bharath Institute Higher Education Reserach, Cheennai

Intermediate (12th) – Narayana College *Percentage: 75.88% — 2023*

10th – Harsha Convent High School *Percentage: 98.0% — 2021*

Projects

Journal Entries Application *Aug 2025*

- Developed a secure journal management application using **Pandas, Numpy, Visualization with Automation tools**.
- Built full CRUD functionality and integrated authentication using tracebacks with password encryption.
- Enhanced performance by optimizing queries through libraries repositories.
- **Tech Stack:** Python, Numoy, Pandas, Visualization, Automation Tools.

Rose Plant Disease Detection *Mar 2025*

- Designed and deployed a web-based system recommending optimal solutions based on disease type.
- Engineered a responsive and interactive interface using **ReactJS, CSS, and Framer Motion**.
- Integrated real-time weather and environmental data to generate dynamic insights for crop selection.
- **Tech Stack:** ReactJS, CSS, Framer Motion.

Email Verification System *Jun 2024*

- Executed an OTP-based email verification system enabling secure registration and login.
- Applied email validation, OTP generation, and session management workflows using **Java**.
- Enforced data integrity through robust error handling and secure verification mechanisms.
- **Tech Stack:** Java, SMTP, Hibernate, MySQL.

Certifications

- Core and Advanced Python Infinity (*Sep 2025*)
- AICTE and Virtual Intenship Infinity (*Oct-Dec 2025*)

Internal Hackathon Infinity (*22 sep 2025*)

BootCamp from Superport as Data Science Infinity (*Jul-2025*)
